

PURE ESSENTIAL OILS - AROMATHERAPY

Essential oils are the concentrated, volatile, aromatic essences of plants. Depending on the essential oil, it can be used on the skin, inhaled, or diffused. Aromatherapy means "treatment using scents." The idea behind this is, first to find the scents, unique for each individual, that evoke positive sensory feelings and emotions; and then to introduce those scents into our everyday life to enhance well-being. (There are 5 ml per bottle, unless noted)
